GOLFBOARD USER DATA

53% OF ROUNDS PLAYED ON A GOLFBOARD ARE BY GOLFERS WHO
"PLAYED TODAY BECAUSE OF GOLFBOARD."

Over 12,000 registered
GolfBoarders were asked,

'Did you play today because of GolfBoard?'

6,900 answered 'Yes'

Of the 12,982 surveyed, 6,902/53.2% said
YES, they played because of GolfBoard

IF EVERY GOLF COURSE OFFERED GOLFBORDS, GOLF WOULD BE THE MOST POPULAR SPORT IN THE WORLD.

— **Stina Sternberg, Golf Digest Global Golf Director**

"We've seen the success of GolfBoard at the handful of Troon courses who already have them, including the Westin Kierland Resort and Spa in Scottsdale, Makai Golf Course on Kauai and World Golf Village, and we're excited to extend further adoption at Troon destinations around the world. Offering GolfBoards is a great way to bring new people to golf, it makes rounds faster and it creates great buzz. Frankly they're just a blast, and golfers of all ages can use them."

— **Kris Strauss, VP Sales & Marketing for Troon Golf**

"GolfBoard is exactly what our Billy Casper Golf Ventures initiative seeks: a contemporary, exciting and differentiating identity to attract and retain players. Not only is 'GolfBoarding' a thrilling and quick way to get around the course, its turf friendly and delivers ROI to our operations."

— **Peter Hill, Chairman & CEO, Billy Casper Golf**

"Not only does the GolfBoard increase the pace of play it is also attracting a younger demographic to the sport. Players who are higher in age still find the GolfBoard super easy to ride, and GolfBoarding is a fantastic form of entertainment between shots. We are so happy with this product and how it is going to change the game."

— **Luan Pham, Executive Director Integrated Marketing, Golf Digest**

2-piece wheel hub

Carrying Capacity 127kg

Stainless steel stability bar

Front and rear impact bumpers

MANUFACTURED IN THE USA

MAINTENANCE

The GolfBoard is as close to 'Maintenance-Free' as you can get. Charge overnight, check the tires, a quick inspection and they're off to the first tee.

At the end of the day, simply blow off the equipment with air, wipe down with a damp rag, park and plug in to be charged. It's as simple as that.

Tire maintenance will be the most important daily inspection item, and our split-rim design makes tire changing a snap. Daily pressure checks are recommended.

Club maintenance professionals will also have access to GolfBoard University, a place where you can find video tutorials geared towards helping you keep your Golf- Boards in top running condition.

Easy maintenance helps keep your GolfBoards out on the course carrying golfers, thereby producing more revenue for the course operator.
